- On-site PSV, LGV, HGV, ADR & MOT Testing
- Class IV & VII MOT's (Diesel only)
- 'O' Licence Inspections
- Voluntary Brake Testing
- Smoke Emissions Testing
- Headlight Aim Testing
- Digital & Analogue Tachograph Installation
- Calibration & Repairs
- Vehicle Repainting, Repairs & Accidental Damage

VOSA ATF STATION

Two lanes operating 5 days a week with Saturday testing available.

TACHOGRAPH CENTRE

Malcolm Maintenance is approved by the Department for Transport (DFT) to fit, calibrate or repair tachograph systems on all types of vehicles.

BREAKDOWN SERVICE

Malcolm maintenance offer a breakdown and call-out service. A mechanic will come to your assistance and, if need be, organise to bring your vehicle into our workshop at Linwood to make any further repairs necessary.

REPAIR & BODYWORK

Our Maintenance Centre has the facilities to provide high quality body work repairs for cars, vans and all types of commercial vehicle. Our qualified team ensure the quality of the work surpasses MOT requirements. Where bare metal has been exposed or where welding has been carried out, suitable corrosion prevention methods are used.

PAINTSHOP FACILITIES

The division operates a paint shop, which is housed within the Maintenance Centre at Linwood and provides all types of paintwork renewal or touch-up. Our five controlled-environment spray booths, with low-bake drying ovens, are large enough to hold any commercial vehicle, including articulated vehicles. Painting and finishing in an enclosed booth gives a quick, efficient and longer lasting, superior quality finish.

FLEET MANAGEMENT

Malcolm Maintenance provides a comprehensive fleet management package which can be tailored to suit individual customers. Using our fleet management system enables maintenance schedules to be compiled, controlled and administered in accordance with an organisation's service level requirement.

Our system offers access to a full vehicle service history at any time. This level of control guarantees your vehicle fleet is maintained and kept in a condition that meets legal requirements and ensures its optimum performance and reliability.
